

Terms of use

The use of "MO|RE data" implies acceptance of these terms of use. MO|RE data is a generally accessible eResearch infrastructure for sports science motor research data. The infrastructure is operated by the Institute for Sport and Sport Sciences (IfSS) at the Karlsruhe Institute of Technology (KIT). Data sets are stored and archived in the technical environment of the RADAR4KIT research data repository.

The terms of use address the following two user roles: Data users and data providers. Data users use the search function and download suitable data sets. Data providers upload data to MO|RE data. For a full use, a prior registration and login is necessary.

All information and explanations on how MO|RE data works can be found in the corresponding manual (see download area).

1. Scope of application

The following terms of use apply to the use of MO|RE data between the user and the operator of the database. Use is only permitted if the user accepts these terms of use. The terms of use of RADAR4KIT, which can be viewed here <https://radar.kit.edu/tos.html#receiver>, must also be observed.

2. Data input and general access requirements

2.1 Data input

a) Users of MO|RE data undertake not to misuse the database, including the intentional entry/supply of false data. Likewise, no illegal content - e.g. content glorifying violence, inciting hatred or defamatory content - may be uploaded.

b) Users provided with an access are obliged to protect the access against unauthorized use by third parties and are liable for any unauthorized use of an assigned access password made possible by their conduct, insofar as culpability applies. Users shall notify the operators of the database immediately if there is a reasonable suspicion that one or more accesses have been misused.

c) If the operator is made aware of legal violations in connection with a data record, it can block access to this data record without consulting the data provider and delete it if necessary. In addition, the operator reserves the right to block access to MO|RE data if it is used contrary to these terms of use.

d) Data providers declare their consent that the data provided by them may be used by data users (download, calculations, representations). The use of the data sets is permitted under the conditions of the selected license [CC-BY-SA 4.0](#), [CC-BY 4.0](#) or Scientific Use License 1.0.

e) The copyrights of the respective data providers to the original data set stored unchanged in MO|RE data remain intact.

f) The data may only be submitted in anonymized form. Should personal data be included, the inclusion of the data record in MO|RE data will be rejected.

g) By providing the data sets, the data providers agree to the storage of their data required during registration and to the agreements on data transfer and use stated in the terms of use.

h) In order to upload data sets and use certain services of MO|RE data, a one-time registration is required. MO|RE data uses your personal data exclusively for the provision of the service in accordance with Art. 6 Para. 1 lit. a, f DSGVO for the purposes of user identification as well as for contacting you in the context of service provision (consent, safeguarding legitimate interests, in particular functionality of the service). This ensures that contact can be made retroactively with the data provider in the event of necessary corrections or other intervening measures.

2.2 Quality assurance

a) The data provider is responsible for the completeness of the data set.

b) This includes the provision of sufficient data-related (e.g. authors, title, year) and subject-specific metadata (data type, measurement specifications, abstract).

c) With the transfer of the datasets and the associated metadata to MO|RE data, an automated (filter) and a subject-specific quality assurance (editorial board) takes place. Details can be found in the manual.

2.3 Archiving, data protection

a) Data contributed to MO|RE data are stored and managed according to EU law.

b) Data sets are made available by MO|RE data for an unlimited period of time.

c) The associated data protection declaration (cf. download area or registration e-mail) must be observed.

2.4 Reproducibility and subsequent use

a) All published datasets receive a Digital Object Identifier (DOI) as a persistent identifier.

b) The assignment of DOIs ensures that datasets are uniquely identified and referenced. Furthermore, the data will be discoverable in other scientific databases and portals.

c) MO|RE data is not responsible for any kind of communication of results from analysis and/or interpretation of the provided data.

d) By using the data, you agree to act in accordance with the GDPR.

e) Data users agree to cite all used data sets according to good scientific practice.

3. Liability disclaimer

MO|RE data has been developed carefully and to the best of our knowledge according to the current state of the art. However, no warranty for error-free functionality can be given. We therefore expressly exclude liability for all damages of any kind arising from the use and application of the database.

4. Modification of the terms of use

These terms of use come into force on 01.05.2025.

The operator reserves the right to change these terms of use at any time and without giving reasons.
